Education Background

Ecole 42

Full-stack C Developer
Software engineering, Non-degree

Alem Coding School

Full-stack Go, JS Developer
Software engineering, Non-degree

Work History

Maqsut Narikbayev University

Full-stack Developer
2024 - Present

Developing internal and public-facing services for the university's academic and administrative operations, including the official website, library system, internal workflow platform, admissions CRM, and LMS.

Hacktau

Front End Developer
2022 - 2024

Worked on two separate projects:

- As an outsourced frontend developer for a major Turkish e-commerce platform.
- As a full-stack developer for an EdTech platform focused on Turkish culture and tourism for foreigners.

National Teacher Prize Kazakhstan

Full-stack Developer
2019 - 2022

Built a national competition platform for teachers in Kazakhstan with entry submissions, result tracking, and anonymous real-time voting. Transparency was audited by PwC.

Certificates & Courses

JavaScript Algorithms and Data Structures
Front-end development libraries
Responsive Web Design
Back-end development and APIs
Foundational C# with Microsoft
JavaScript HackerRank
React HackerRank
Backend Path with Node.js

Career Objective

I specialize in full-stack web development within the JavaScript/TypeScript ecosystem. I'm skilled at launching MVPs, maintaining and scaling mature products, and optimizing legacy code. I follow a pixel-perfect approach with semantic markup and SEO principles in mind.

Passionate about building EdTech solutions and products with meaningful social impact.
